

Periodontal Disease and Dental Implants

Tuesday 9th April 2019

18:30 - 20:30

Carrington Suite, Missenden Abbey, London Road, Great Missenden, Buckinghamshire, HP16 0BD

1.5 hours CPD

A presentation suitable for all members of the dental team.

Aims & Objectives

- Clarify the new periodontal disease classification.
- Explain the influence of periodontal disease on dental implant outcomes.
- Discuss the current management of patients with severe periodontal disease and likely tooth loss.

GDC learning outcomes

- A
- C

Ken Hemmings - BDS MSc DRDRCS MRDRCS FDS RCS ILTM FHEA

Ken graduated with honours in Dental Surgery from Bristol University in 1982. Junior hospitals posts followed at Bristol, Birmingham and Torquay before gaining a Registrar in Oral Surgery position at the Royal London Hospital. He gained his London fellowship in 1986 before entering the speciality of Restorative Dentistry.

Whilst studying for a two year MSc programme in Conservative Dentistry at the Eastman Dental Hospital he avoided financial destitution by working part-time as a Registrar and in general dental practice. He completed Senior Registrar training at the Eastman in 1993. He took up a full time consultant post in the departments of Conservative Dentistry and Periodontology in August 1995. He is recognised by the GDC as a specialist in Restorative Dentistry, Prosthodontics, Periodontology and Endodontics. He was president of the British Society for Restorative Dentistry 2014-15.

His research interests and publications, including two books, have covered the management of toothwear, hypodontia, tooth replacement and periodontal/restorative interactions. He now shares his time between hospital and private practice. He has been involved with Neoss implants since their introduction into the UK in 2000.
